## Work Experience

### TwinLit

July 2025 – Nov 2025

Software Developer Intern (Remote)

Bishkek City, Kyrgyzstan

- **Engineered** and optimized features using **JavaScript** and **PostgreSQL** to improve application performance.
- **Resolved** technical issues and delivered **120+** hours of remote development on schedule.

### International Online Subject and Project Olympiad (IOSPO)

June 2025 – Aug 2025

Web Developer Intern (Remote)

Almaty, Kazakhstan

**Project:** IOSPO Student & Admin Portal Website - [Live](#)

- **Engineered** the **IOSPO web platform** from the ground up, architecting secure role-based student and admin portals with full **CRUD** operations, **session-based authentication**, and **access-controlled routing** to **safeguard sensitive student data**.
- **Optimized** the **MySQL** database and managed data architecture to ensure system stability and scalability for **500+** active students.

### “Günbatır Şapagy” Education Center

Jan 2024 – Feb 2025

Freelance Software Developer (Hybrid)

Balkanabat, Turkmenistan

**Project:** Full-Stack Management Web Application for Education Center

- **Led a team** to architect and develop a full-stack education management platform from scratch using **Laravel, PHP, and JavaScript**.
- **Engineered** secure, role-based student and teacher portals featuring complete **CRUD** functionality and responsive design.
- **Managed** end-to-end server deployment and hosting configurations to ensure reliable system uptime.

## Technical Projects

**AeroClaim Autopilot** | .NET, React, LLaMA 3.3, ElevenLabs - [GitHub](#) [Presentation](#)

- Co-developed a **voice-native AI agent** that verifies flight-compensation eligibility and drafts demand letters in under 30 seconds, built on a multi-service **.NET 10 Minimal API + AI worker + React/Vite** architecture with **CQRS** via **MediatR** and **EF Core/SQLite**.
- **Secured 2nd Place Overall** out of 150+ participants at the **GDG Budapest FinTech Hackathon**, winning an exclusive **job shadowing** experience at **Wise**.

**JetChat AI Assistant** | Kotlin, Jetpack Compose, Groq SDK, RAG - [GitHub](#)

- **Developed** a native Android conversational AI app for near-instant **LLaMA 3.1 inference**.
- **Implemented** a custom Retrieval-Augmented Generation (**RAG**) engine over local knowledge bases to ground responses in context-specific data and **reduce hallucination**.

**JetFurniture E-Commerce Ecosystem** | Kotlin, Jetpack Compose, React.js, Firebase - [GitHub](#)

- **Built** a full-stack **e-commerce ecosystem** with a **native Android** client and a **React.js** admin dashboard sharing a unified **Firebase backend**.
- **Integrated Firebase** for real-time inventory sync and optimized the mobile UI using **Material Design 3**.

## Education

### Eötvös Loránd University

Sep 2025– Present

Bachelor of Science, Computer Science

Budapest, Hungary

- **Relevant Coursework:** Data Structures & Algorithms, Object-Oriented Programming, Database Systems.

## Skills/Languages

**Programming languages:** C#, Java, C, Kotlin, JavaScript, TypeScript

**Developer Tools:** Git, VS Code, IntelliJ IDEA, Android Studio, Figma

**Frameworks & Libs:** Laravel, Bootstrap, React JS, Tailwind CSS, JetpackCompose

**Databases:** MongoDB, MySQL, Firebase, PostgreSQL

**Language:** Turkmen(**native**), English(**C1**), Russian(**C1**), Turkish(**B1**)
